GUIPING MEI is a fashion and accessory designer, digital media designer, creative professional born in Chongqing China, in 2001.

WORK EXPERIENCE:

Han Art Overseas Arts Center / **Materials and Styling Designer** / 2024.07 – 2024.10
Portfolio Mentorship: Mentored students on design logic, material innovation, and narrative development.
Technical Guidance: Supervised garment construction and craftsmanship to ensure high-standard execution.
Visual Direction: Guided fashion styling and editorial photography for final project presentations.

Chongqing Langpin Cultural Communication / **Accessory Designer** / 2022.01 – 2022.05
Product Launch: Designed accessory and luggage collections successfully launched and commercialized online.
Visual Identity: Managed end-to-end design for advertising, publications, and brand promotional materials.
Strategic Design: Translated marketing strategies into creative visual solutions through cross-departmental collaboration.

Jiachen Mei Art Education / **Teaching Assistant** / 2022.07 – 2022.09
Foundational Training: Tutored sketching and color theory for art college entrance exams.
Progress Management: Improved student technical proficiency through personalized pedagogy.

SERVICES:

Fashion & Accessory Design / Digital Fashion & 3D Prototyping / Creative Direction & Visual Storytelling / Portfolio Mentorship & Design Consulting

ACADEMIC PROJECTS:

THE SENSITIVE MONSTEROLOGY / (FAashion design & Textile Art, 2026) / Exploring the symbiosis of character creation and textile research in a speculative future.

ADITI Brand Workshop / (FAashion design, 2025) / Creating a new collection of sports yoga products and apparel designs for the ADITI brand.

Rural Revitalization via Digital Tech / (Bag design, 2022 – 2024) / A study on the transformation of traditional handicrafts through AI and digital tools.

Accessory Design & Social Media Trends / (2022) / Research on aesthetic evolution among Gen-Z university students and its impact on entrepreneurship.

AWARDS:

Academic
National Scholarship / 4-year recipient
Nationally Recognized Outstanding Graduation Project / 2024 – 2025

Industry
Merit Award / **NEXT GEN LEATHER DESIGNERS** / 2025/26
Silver Award / **The Leather Cup** / 2021
Merit Award / Leather Creative Design Competition, Beijing / 2023
Merit Award / Global Sports Equipment Design (Tsinghua Univ.) / 2022

SKILLS:

Creative Suite: Photoshop, Illustrator, InDesign, Premiere
3D & Tech: Rhino, CREO, C4D, CAD, WebGL/Programming
Innovation: AI-powered design tools, Virtual Prototyping
craftsmanship: Leatherwork, metalwork, weaving, enamelwork, lacquerware, sewing, material research and manipulation, drawing , etc

LINKEDIN:
<https://www.linkedin.com/in/guiping-mei-291843332>

Driven by the avant-garde spirit of artistic innovation, my work explores the tension between raw emotion and masterful craftsmanship. I bridge the gap between **traditional tactile materials** and forward-looking **digital tools** to create artworks that push the boundaries of contemporary fashion.

02/ The Sensitive Monsterology: MA Final Project: Fashion Design & Digital Accessories

Creative Arts and Technology / Styling / Fashion / Accessories / AI and Interaction

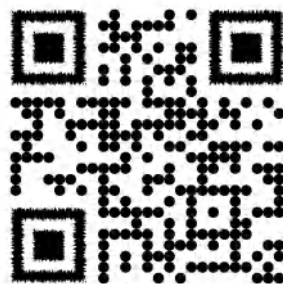

"A visual archive of hyper-perceived sensations."

From the perspective of highly sensitive individuals, this series explores emotional overload and energy drain in social environments. By conceptualizing emotions as "invisible monsters," I translate visualized sensations into silhouettes and textures, where every fabric becomes a part of a monster's skin, an embodiment of our inner holes and sensitive antennas.

THE SENSITIVE
MONSTEROLOGY

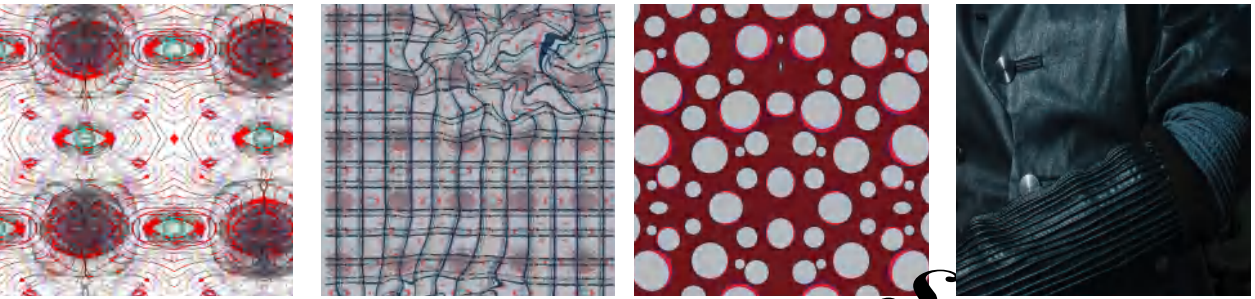

"Serotonin II: The Fragmented Knight"

Inspired by the sonic world of Yeule, this collection explores the internal collapse and spiritual resilience of a "Broken Female Knight." Through five hallucinatory emotional states: Anger, Sadness, Indifference, Fear, and Arrogance, the garments serve as a psychological landscape. Utilizing modular draping and custom-engineered prints, the series navigates the boundary between futuristic surrealism and emotional deconstruction, symbolizing the journey of rebuilding a shattered self.

01/ Bliss Nakes : Wearable Bag Project: Accessory Design & Character Development

Creative Arts and Technology / Patternmaking / Character Design / Accessory Design

“Utopian Glitch: Grounded in game mechanics and utopian critique, this project materializes human desires within a virtual worldview. By merging biological characteristics with symbolic design, I developed three distinct character roles and their corresponding accessory collections. The work bridges bio-fabric modification, Sinamay hot-pressing, and traditional leathercraft, serving as a visual warning against the fragility of utopia and the predatory nature of excessive desire in a digital age.”

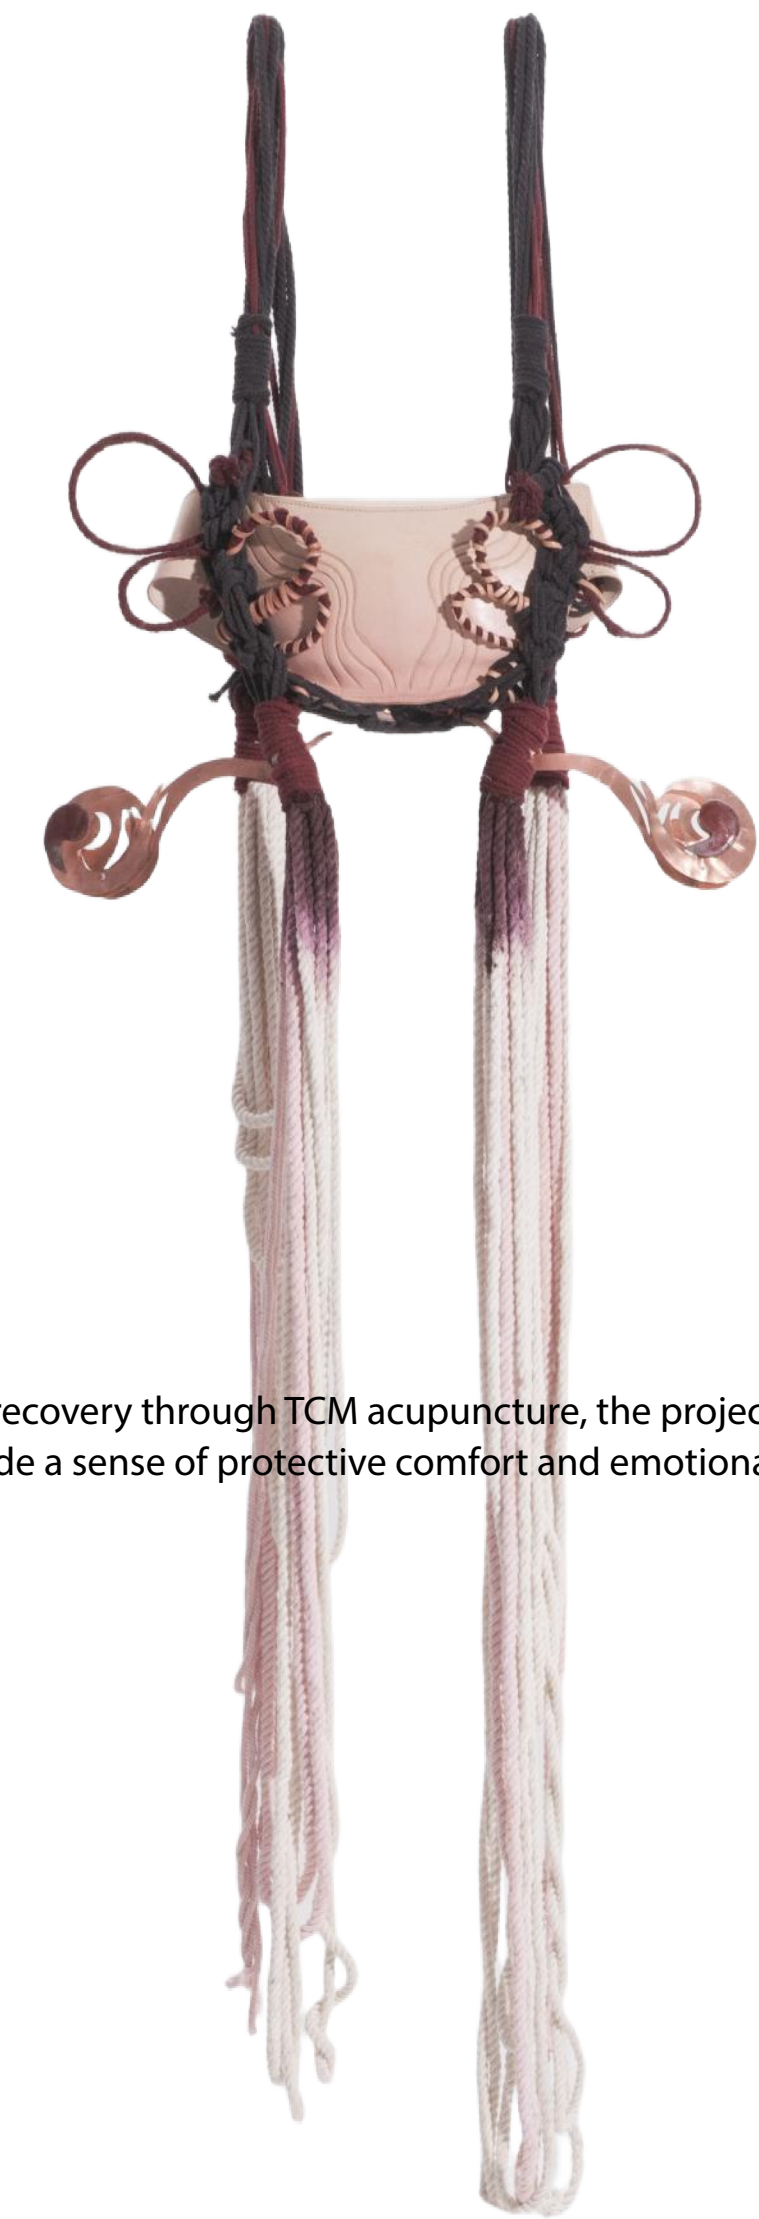

02/ DISPEL : Wearable Accessories Project: Accessory Design and Sound Therapy Interaction

Accessory Design / Sound Therapy Interaction / Intimacy / Anxiety and Attachment / Perfectionism

03/ Healing acupuncture : Wearable Bag Design & Enamel on metal

Creative Arts / Wearable Accessories Design

Metalwork / Weaving Techniques

This accessory collection, titled '**Healing acupuncture**', explores the intersection of therapeutic tradition and avant-garde craftsmanship. Inspired by the narrative of childhood trauma recovery through TCM acupuncture, the project translates techniques of 'internal needles and external care' into a conceptual headdress and three sculptural bags. By fusing leather shaping, 3D printing, enamelling, and weaving, the work serves as a tactile medium for empathy, aiming to provide a sense of protective comfort and emotional resonance for those navigating similar paths of healing."

03/ Healing acupuncture : Wearable Bag Design & Enamel on metal

Creative Arts / Wearable Accessories Design /Metalwork / Weaving Techniques/Leather Craft

"Technical Innovation: Abandoning traditional pattern-making for a sleeker silhouette, I combined 3D-printed 'shells' with hand-carved, vegetable-tanned leather molding. The collection marries structural rigidity with artisanal warmth—featuring hand-soldered copper skeletons, multi-layered enamel work, and bespoke 'halo' dyeing to recreate the visual essence of bodily blockage. Every piece is a testament to the intersection of digital precision and manual labor, entirely hand-sewn to achieve a seamless, sculptural form."

04/ Help Me Out A Bit! : Bag Design & Facial expressions

Creative Arts / Accessory Design / Social Commentary / Interactive Bag Design

This project explores the paradox of digital emotional fluency versus real-world social anxiety. By using innovative drawstring techniques to physically deform leather and mixed-media bags, the collection translates four "unspeakable" emotions into exaggerated, tactile forms. These interactive designs serve as a medium to alleviate social awkwardness and bridge the gap between inner feelings and outward expression.

05/ Bag Design Exercises : Creative Expression in Design

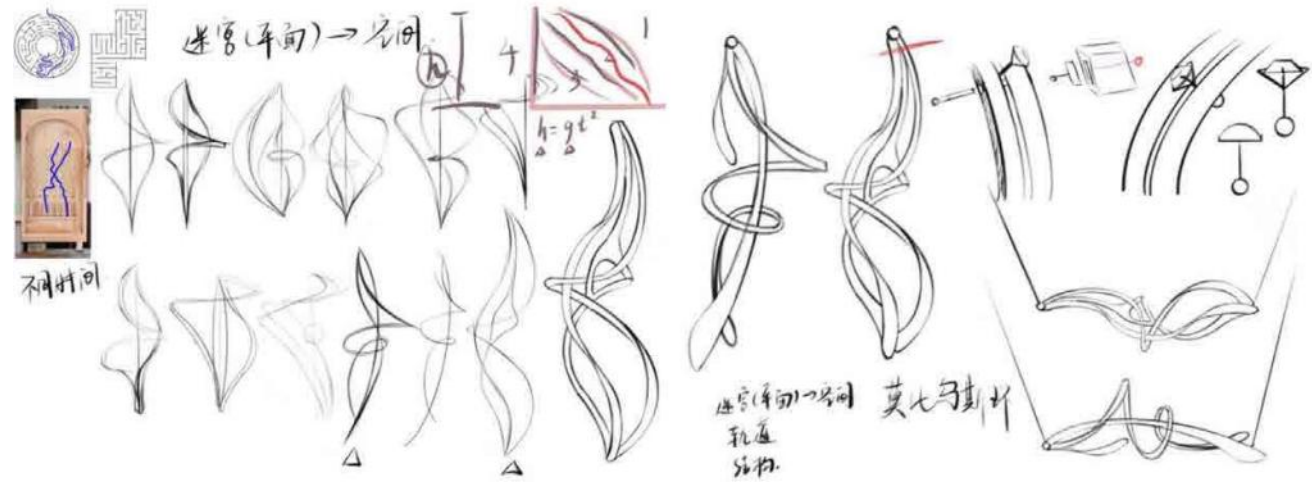

Inspired by the Möbius strip, this design explores the concept of infinite motion in the bag's form and creates a visual sense of entanglement when worn.

06/ Bag Design Exercises : Creative Expression in Design&Technical Exercises

Handcrafted leather goods, vegetable-tanned leather & cowhide

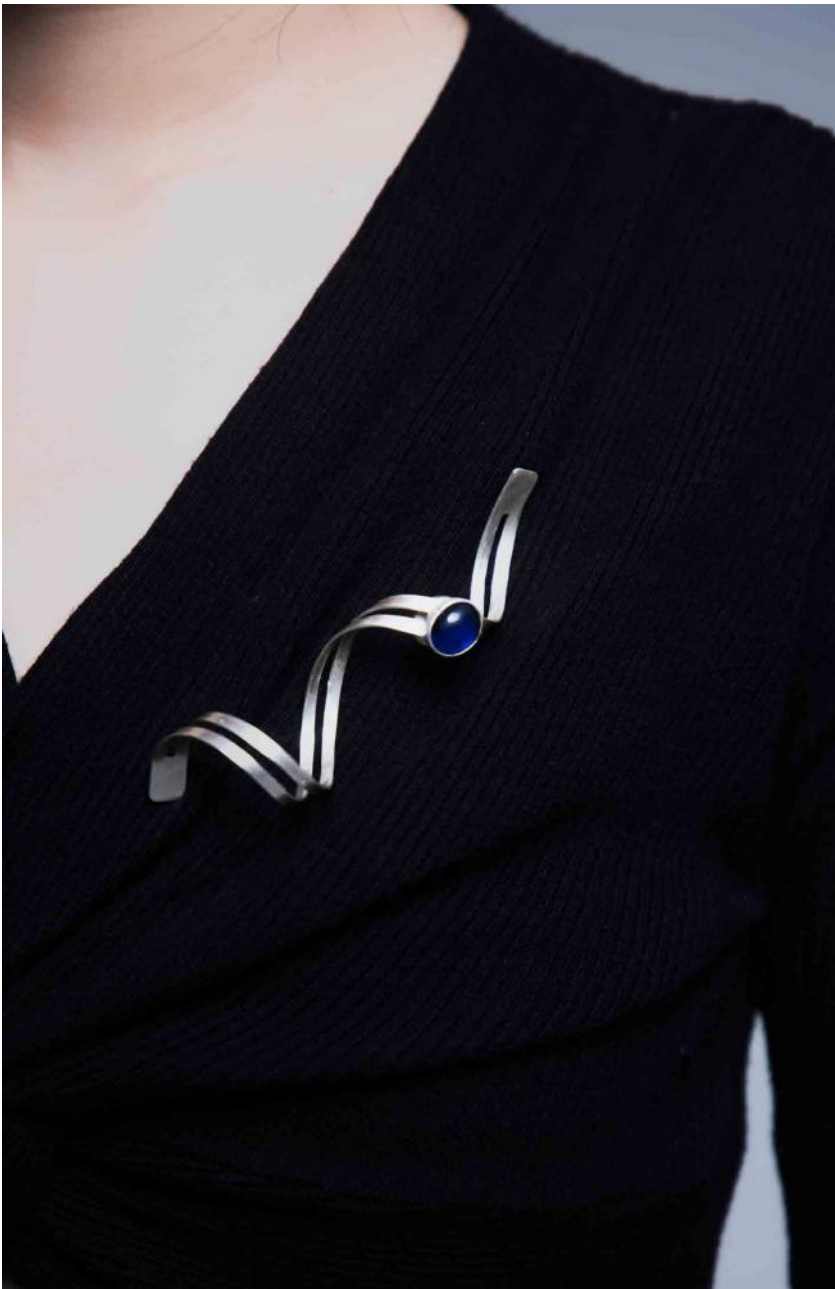

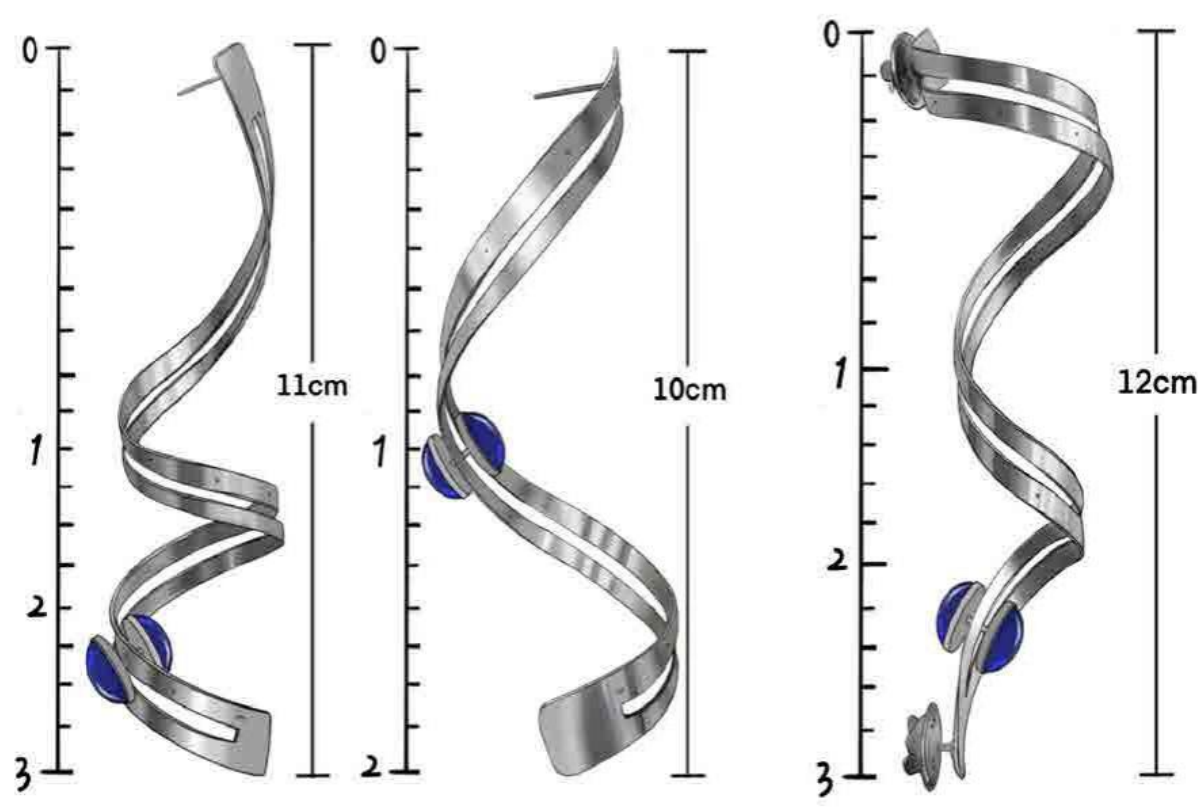

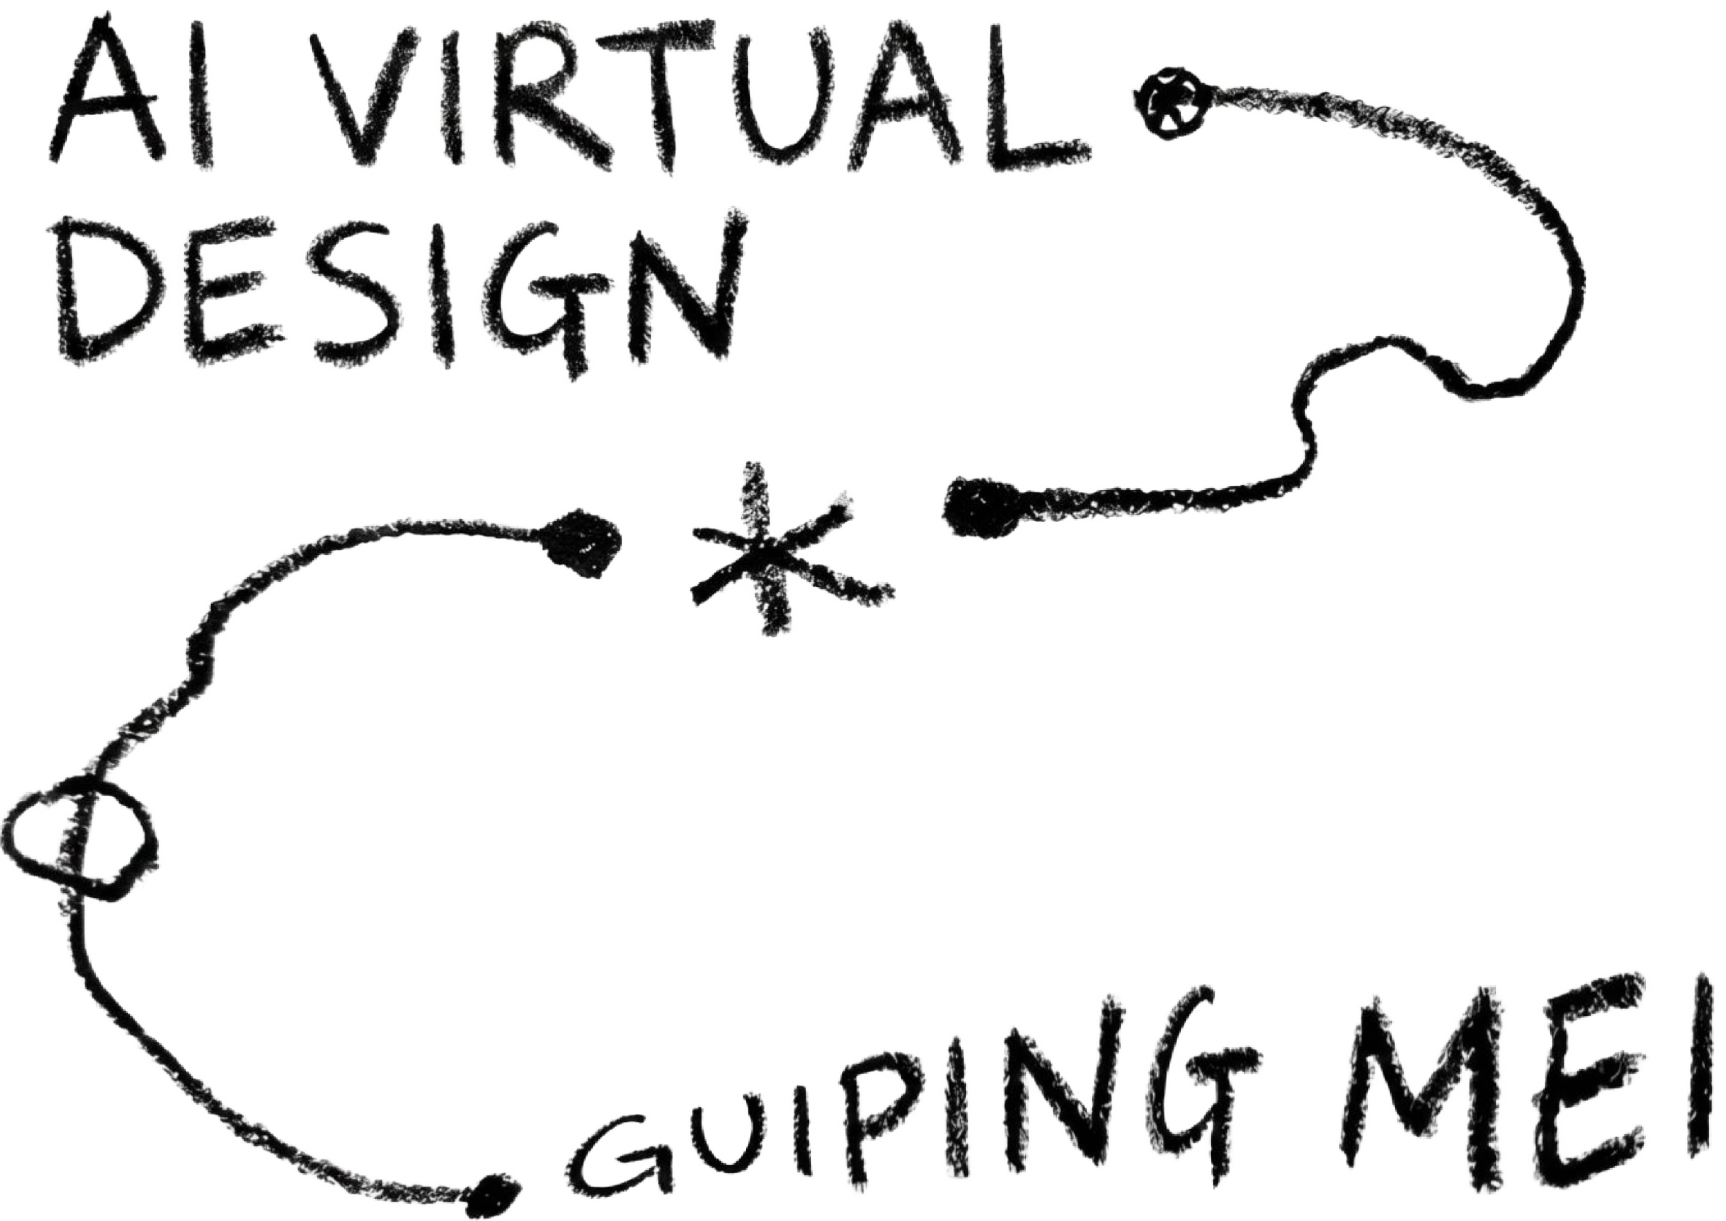

07/ Jewelry Design : Creative Expressions Through the Fusion of Jewelry and Time

Jewelry Craftsmanship, Soldering Techniques, Gravity Calculations

Time takes many forms; we record the paths of its arrival and departure, transforming it from an abstract concept into a tangible shape. A single moment, the fluidity of a day, is imbued with power within space. Create a day that resonates, a moment to reflect on oneself in contemplation.

01/ AM I WASTING THE CRULTY? : AI Visualization & Sociology & Installation Art

Creativity and Art / AI-Generated Art
/ Social Insights / Installation Art /
Ethics

"The Normalization of Violence: Using fish and fishskin as a primary case study, this project interrogates the ethical dissonance between emotional morality and the expectations of design objects. It challenges the role of designers in sanitizing systemic violence and waste, forcing the audience to confront socially accepted choices. By reconciling cognitive and emotional conflict, the work serves as a provocative catalyst for deeper reflection on the hidden costs of our material culture."

01/ Clang&Clattered : Headscarf Design Print Design

Headscarf Design / Print Design / Screen Printing Process

Inspired by the sharp, malleable nature of metallic jewelry, this design utilizes a "metallized spine" as a central motif. The spine, a mechanical miracle of strength and flexibility, is reimagined as a bridge where human creation encroaches upon biological boundaries. Through the rhythmic repetition of these skeletal forms, the scarf captures the cold echo of reconstructed nature. "Clink & Clatter" transforms static fabric into a sensory reminder of the pulse of time and the structural order carved from chaos.

B a c k

“Driven by an obsession with the organic and the industrial, ‘The Entanglement of Metal and Insects’ explores a symbiotic merging of nature and machine. This Kimono positioning print design intertwines skeletal metallic structures with vibrant insect motifs and human hair, seamlessly draping the body in a primal force of life. As cold metal spirals along the spine, the garment transforms the wearer into a living spectacle, where the heat of the body and the chill of the metal dance in eternal harmony.”

03/ Rust : Custom Screen Printing Designs

Custom Screen Printing Design / Textile Design / Thematic Expression
